

DECODE THE MARKET. BUILD YOUR EDGE.

A premium introduction to Money Xplore — market education, structured technical analysis, practical tools and a modern market-intelligence experience.

STOCK MARKET EDUCATION

Learn how price, trend, structure, volume, indicators, risk and psychology work together — without relying on hype or promises.

FOUNDER

Sharad Panwar
Engineer • Digital Designer • Technical Analysis & Market Education

“Markets reward prepared minds.”

— Sharad Panwar, Founder • Money Xplore

From design thinking to market thinking.

Money Xplore is built around a simple belief: the market becomes less intimidating when people learn how to read it systematically. The brand brings together engineering and digital-design thinking with a long-standing passion for stock-market behaviour and technical chart analysis.

SHARAD PANWAR

Founder / Market Mentor

Engineer & Digital Designer

Technical Analysis & Market Education

Core philosophy

Study the market. Define the risk. Wait for confirmation.
Execute with discipline. Learn from every outcome.

MISSION • VISION

MISSION

To make market education practical, structured and easier to understand — so learners can develop their own analytical process instead of depending blindly on tips or predictions.

VISION

To build Money Xplore into a trusted, technology-led financial education and market-intelligence brand where people learn to interpret markets with clarity, discipline and responsibility.

WHY MONEY XPLORE

LEARN

Understand the market from first principles.

ANALYSE

Turn price movement into structured observations.

PLAN

Define entry logic, invalidation and risk before acting.

EVOLVE

Review outcomes and keep improving the process.

A learning platform built around real market context.

MARKET INTELLIGENCE Search NSE/BSE instruments, inspect market state and study structured technical views.	LIVE MARKET FEED Real market information with market-open/closed awareness.
CALCULATORS Practical tools for risk, returns, goals and purchasing power.	STUDENT LEARNING Gated student access for course learning, classes and community participation.
COMMUNITY Students can share market findings and charts for educational discussion.	RESPONSIBLE LEARNING The experience emphasizes process, discipline and risk awareness.

03 / COURSE OVERVIEW

Learn. Analyse. Trade. Grow.

The learning path is designed around practical market understanding rather than a collection of disconnected indicators.

01 STOCK MARKET FUNDAMENTALS Market basics, instruments, exchanges, charts and terminology.	02 TECHNICAL ANALYSIS Trend, support/resistance, candlesticks, moving averages, RSI and volume.
03 PRICE ACTION & MARKET STRUCTURE Higher highs, lower lows, ranges, breakouts, retests and shifts.	04 CHART PATTERNS & SETUPS Triangles, flags, channels, reversals and consolidation.
05 SWING & POSITIONAL THINKING Scenarios, invalidation and follow-through across timeframes.	06 RISK MANAGEMENT Position sizing, stop-loss logic, risk-reward and capital protection.
07 TRADING PSYCHOLOGY Patience, uncertainty, emotional control and process thinking.	08 PRACTICAL MARKET RESEARCH Combine structure, indicators, volume and context into a checklist.

LEARNER OUTCOMES

Read charts • identify trend, range, support and resistance • use momentum and volume as evidence • define invalidation and risk • calculate position size and risk-reward • build a repeatable research checklist.

STUDENT VOICES

What our learners say.

Real learning experiences from Money Xplore students — focused on teaching clarity, practical chart analysis, discipline and independent thinking.

OMVEER CHAUDHARY

★★★★★

Sharad Sir's teaching is patient, well-structured and full of clear logic. Live chart analysis makes concepts practical and easy to apply. I especially valued the focus on market structure, risk management and discipline. It changed my approach from random trading to a planned, rule-based process.

VAIBHAV KADAM

★★★★★

A very good learning experience with Money Xplore. Sharad Sir's teaching is simple, practical and beginner-friendly. Live chart analysis helped me understand zones, trends, support and resistance. The focus on risk management and discipline made the learning much more meaningful.

BHARTI SINGH

★★★★★

Sharad Sir's teaching style is engaging and easy to follow. Concepts are explained clearly with practical, real-time examples. His guidance helped me understand technical analysis and market behaviour better. The course has strengthened my approach and confidence in analysing the market.

AKSHAY PANWAR

★★★★★

Sharad Sir explains complex market concepts in a simple and practical way. He focuses on understanding the market rather than blindly following tips. His teaching is clear, engaging and research-driven. I especially appreciate the emphasis on patience, risk management and disciplined decision-making.

AJEET SINGH

★★★★★

Sharad Panwar Sir has a remarkable teaching style and strong focus on preparation and research. He explains the reasoning behind every analysis with great attention to detail. The biggest takeaway for me is learning to validate setups, plan entries and exits, manage risk and make evidence-based decisions.

Student feedback shared with Money Xplore.

01 HDFC Life Insurance Co. Ltd.

HDFC Life Insurance: Simple Bullish Setup

Real chart study • Support • Resistance • Structure • Momentum

TECHNICAL READING

The chart shows a broad rising structure with a long-term ascending support trendline and a major resistance zone overhead. After a sharp decline, price has entered a smaller consolidation close to the lower support area; the highlighted zone marks the point where buyers may attempt to defend structure. RSI is around 35, showing weak momentum and a relatively stretched condition. Educational read: support is the key structural reference; a sustained recovery would need improving momentum and a move back through resistance.

02 SBI Cards & Payment Services Ltd.

Big Pattern Observed in SBI Cards & Payments Ltd.

Real chart study • Support • Resistance • Structure • Momentum

TECHNICAL READING

The weekly chart highlights a large “Bow & Tie” structure bounded by rising support and overhead resistance. Price is shown testing the lower support region near 600, while the principal resistance area sits around 1,050–1,100. The cyan measurement illustrates the author’s projected pattern range toward the upper zone. Educational read: the setup is defined by compression between support and resistance, so confirmation above resistance and sustained volume would be important before treating the projected move as a confirmed breakout.

03 Shriram Finance Limited

Shriram Finance Ltd — Breakout of Head & Shoulder Pattern

Real chart study • Support • Resistance • Structure • Momentum

TECHNICAL READING

The chart marks a clear Head & Shoulders formation with a horizontal neckline around the mid-630s/640 area. Price has broken above the neckline and the annotation shows a breakout/retest sequence, while the next visible resistance zone is around 700–710. The RSI panel is above 60 and the marked RSI trendline breakout supports improving momentum. Educational read: the important checkpoints are the neckline hold, continuation after the retest and the ability to clear the next resistance zone.

04 Jubilant Foodworks Limited

Jubilant Foodworks Near Long Term Support

Real chart study • Support • Resistance • Structure • Momentum

TECHNICAL READING

The weekly chart maps a long-running rising channel with repeated reactions from both the upper resistance boundary and the lower support boundary. Multiple historical arrows show how price has responded to these channel zones over many years. The current structure is positioned in the lower half of the long-term channel, making the support boundary the main reference for the study. Educational read: channel support can define a higher-risk/high-reward observation area, but confirmation and risk control remain essential because a decisive channel breakdown would change the structure.

05 Amber Enterprises India Ltd.

Momentum in Amber Enterprises Ltd

Real chart study • Support • Resistance • Structure • Momentum

TECHNICAL READING

The weekly chart shows a prior uptrend, an extended sideways phase and a large Inverse Head & Shoulders structure. The yellow neckline zone is the central technical reference; the chart then marks a breakout followed by a retest, with projected targets around 10,200 and 13,300. The weekly RSI also shows a marked breakout, indicating improving momentum in the author's framework. Educational read: the strength of the setup depends on the neckline holding after the retest and on price maintaining the prior uptrend structure; the targets are chart annotations, not guaranteed outcomes.

Clarity over noise. Process over prediction.

Money Xplore is designed to help learners ask better market questions, interpret evidence and manage uncertainty. The goal is not to promise perfect predictions; it is to develop a repeatable way of thinking.

NO GUARANTEED RETURNS

Markets are uncertain. No educational framework can guarantee an outcome.

RISK FIRST

Capital protection and position sizing are part of the learning process.

EVIDENCE BASED

Price structure, volume, indicators and context should support a market view.

INDEPENDENT THINKING

Learners should build and challenge their own thesis.

THE MARKET NEVER STOPS MOVING. Neither should your understanding of it.
